DETAILED ACTION

Reason For Allowance

1. Claims 1-20 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 10, 19 and 20, which include (claim 1, 10) an electrode injection layer comprising of a first and a second metal compound both the first metal compound and the second metal compound including a metal element selected from the group consisting of alkali metals alkaline earth metals and rare earth metals; (claim 19) an electron injection layer formed corresponding to the first luminescent layer and second luminescent layer in common; (claim 20) an electron injection layer formed corresponding to the first luminescent layer and second luminescent layer in common, the electron injection layer including Lithium (Li) and Strontium (Sr).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2873

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kuma et al. (US Patent 6,844,670 B2) discloses a luminous device in Figure 1 comprising of anode, cathode, electrode injection layer, a luminescent layer wherein an alkali metal, an alkaline earth metal, a rare earth metal, an alkali compound, an alkaline earth compound, a rare earth compound, an alkali metal to which an organic compound is coordinated is added to an electron injection material (col.9 lines 62-67); however, Kuma et al. does not teach or fairly suggest an electrode injection layer comprising of a first and a second metal compound both the first metal compound and the second metal compound including a metal element selected from the group consisting of alkali metals alkaline earth metals and rare earth metals.
